Overview

Opportunities to manufacture electric submersible pump (ESP) system & cable in the UAE:

Opportunity

- Artificial lift is a main element of ADNOC's future, and it will be the core activities for both brown fields and green fields
- It is expected that 50% of the produced oil by 2030 will be by use of artificial lift methods
- Manufacturing and / or assembly of ESP pumps, ESP protectors, ESP motors, ESP cables, Variable speed drive

Applications

- ESP technique is one of the main ADNOC Onshore artificial lift methods
- Utilized in oil and water wells,
