ADNOC & ENI PARTNERSHIP

ADNOC is one of the world's leading energy producers and a primary catalyst for Abu Dhabi's growth and diversification. For over 50 years, ADNOC has played an integral role in Abu Dhabi's economic development, managing, producing and preserving the Emirate's hydrocarbon reserves on behalf of the Abu Dhabi Government.

Eni is a global integrated energy company working in 70 countries around the world. It is active at every stage of the value chain: from natural gas and oil to co-generated electricity and renewables. Eni has operated in the UAE since 2018. Eni is dedicated to the energy transition, taking tangible actions aimed at achieving the total decarbonization of its products and processes by 2050.

ABOUT THE PROJECT?

In January 2019, Eni, as operator, and its partner PTTEP signed an agreement with ADNOC to explore and appraise oil and gas opportunities in "Offshore Block 2".

"Offshore Block 2" has the potential to play an important role producing oil and gas for the benefit of the UAE and its people.

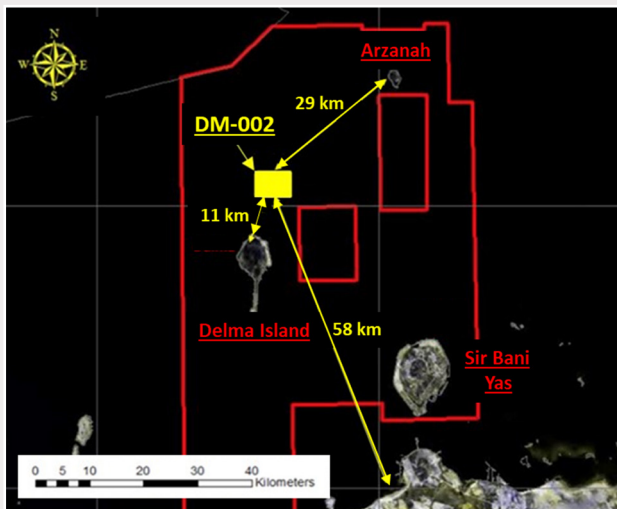

From August, 2021 to February, 2022, Eni safely drilled a well 12km south of Delma Island as part of this process.

WHAT IS AN APPRAISAL WELL?

An appraisal well is used to assess the full potential of oil and gas resources in a reservoir.

For an offshore field, a jack-up rig drills a well into the reservoir and the crew then carries out well testing activities.

UPCOMING OPERATIONS

From August to November 2022, Eni will drill a new appraisal well 11 km north of Delma Island using a jack-up rig.

The rig will be moved into position in August. Drilling operations are then expected to take around 14 weeks.

Throughout the operations, supply vessels from Mugharraq port will operate three times per week to support operations.

TIMELINE

August 2022
Rig Mobilisation

August - October 2022
Drilling Activities

November 2022
Well Testing & Flaring

December 2022
Rig Demobilisation

OPERATIONAL IMPACTS

As the drilling location is 11 km away from Delma Island, there should be minimal impact on the local community. However, during operations you might see:

Traffic: An increase in marine traffic

Flaring: The safe and controlled burning of hydrocarbons

Marine traffic

Flaring / Smoke

As a safety precaution, there will be a 500-meter exclusion zone around the drilling rig.

HEALTH, SAFETY & ENVIRONMENT

Eni has a strong HSE (Health, Safety and Environment) culture that promotes safe behavior and the protection of the environment. Across its operations, Eni is fully committed to eliminating environmental and workplace hazards, protecting communities and workers, and continuously improving our HSE.

COMMUNITY ENGAGEMENT

Throughout these activities, it is a priority for Eni to work closely with local communities. If you have any questions, concerns or feedback, please contact the Eni project team through:
